CAREER SUMMARY

Full-Stack Developer and Data Engineer with 3+ years of experience in data processing pipelines, and full-stack development. Proficient in Python, Django, SQL, and JavaScript. Created solutions supporting thousands of users. Delivered critical solutions that supports multiple platforms.

TECHNICAL SKILLS

Programming languages →	Python, SQL, PHP, JavaScript, Java, C#, typescript, Dart, C++.
Frameworks and Libraries →	Vue.js, React.js, Django, FastAPI, Celery, Flask, Node.js, Flutter.
DevOps & Tools →	Git, Docker, NGINX, Prometheus, Grafana, Airflow, Prefect.
Databases →	PostgreSQL, MySQL, Oracle Database, ClickHouse, CouchDB.
Others Tools & Libraries →	GDAL, Rasterio, Satpy, Pyresample, QGIS, Pandas, NumPy, SQLAlchemy, DuckDB, Delta Lake, Kafka, OCI Object Storage.

EDUCATION

Bachelor's degree in Computer Science

June 2022

Umm Al-Qura University • Makkah • GPA: 3.47/4

WORK EXPERIENCE

Software Developer

National Center of Meteorology

August 2023 - Present

Contracted through: Advanced Electronics Support Services Company (AESSCO) | Aug 2023 – Apr 2026

Contracted through: MIS (Al Moammar Information Systems) | May 2026 – Present

- Built a robust **data processing pipeline** for geospatial imagery, automating metadata extraction, data monitoring, and archiving to support large-scale dataset operations.
- Led and mentored **30+ trainees** across data processing, AI, full-stack development tracks, guiding them to successfully deliver production-ready projects.
- Designed and implemented a **metadata management system** that improved dataset organization, standardization, and discoverability, and exposed it as an API consumed by multiple downstream applications.
- Built frontend interfaces including an interactive **geospatial dashboard** and multiple data-table views, improving data accessibility and usability for end users.
- Designed and developed **scalable RESTful APIs** to power complex geospatial operations — including spatial search over large datasets, real-time data retrieval, and automated generation of structured analytical reports — serving multiple platforms.
- Designed and developed a **RAG-based meteorological chatbot** using GPT-4 API and **PostgreSQL** (pgvector) for vector storage, enabling the system to answer natural language queries with both text responses and auto-generated diagrams.

CERTIFICATIONS

- Computer Science Specialist, Saudi Council of Engineers (SCE) — No. 959047 Aug 2023 – Present
